CS Docket No. 00-30

REPLY COMMENTS OF iCAST AND TRIBAL VOICE

On April 26, we filed documents at the FCC stating our concerns about America Online, which may become exacerbated by the company's proposed merger with Time Warner, Inc.

We posted information to the public on our website and provided an opportunity to for interested parties to file a petition with the government on this issue.

To date, we have received close to 2000 petitions addressed to both the government and America Online, which we have attached.

Respectfully submitted,

iCAST Corporation

Dear Sirs,
Instant Messaging (IM) Interoperability is vital to the successful future of the Web. An Instant Messaging tool should function like electronic mail. E-mail users are able to communicate across all systems and lines, REGARDLESS of provider.

I agree with iCAST and Tribal Voice that America Online should make its IM service open and interoperable.

Instant Messaging (IM) Interoperability is vital to the successful future of the Web. An Instant Messaging tool should function like electronic mail. E-mail users are able to communicate across all systems and lines, REGARDLESS of provider.

I agree with iCAST and Tribal Voice that America Online should make its IM service open and interoperable.
